Telematics Systems differ:

- **Virtual Technician** – Remote Diagnostics and critical events, reporting
- **Cummins Connected Advisor** – Engine health & performance, immediate action alerts, reporting
- **Verizon Fleetmatics** – GPS Fleet Tracking, reporting
- **Zonar** – Electronic log book management, reporting
- **JPro** – Vehicle tracking, material dispersal, diagnostics, reporting

IMPROVE FUEL ECONOMY:

Analytics provides you with expert analysis, detailing over a dozen factors that affect your fuel economy. You'll be able to identify the **specific behaviors**, trends and root causes of changes in fuel efficiency so you can address them quickly and correctly—for a single vehicle or across your fleet. It will even provide you with a **fuel economy score** for each vehicle based on its configuration as well as algorithms developed by experts—letting you know which vehicles are in most need of improvement.

IMPROVE SAFETY:

Analytics collects data from your truck's safety systems and converts it into an easy-to-understand format. Get a comprehensive overview of all safety events across your fleet or drill down even further to a particular vehicle or event. You'll also be able to view a ranked list of your vehicles and provide a safety score— weighted, based on your fleet's own safety priorities. On-board sensor readings are captured from **15 seconds before** a fault event occurred to **15 seconds after** specific events, letting you know what to focus on in order to improve a driver's behavior.

Analytics safety data can be viewed for a **single trip**, **single vehicle**, or your **entire fleet** over different periods of time. Analytics is accessible via a dedicated section of the Detroit Connect portal.

CONCLUSION:

- ✓ User friendly
- ✓ Uses existing hardware
- ✓ Onboard systems:
wireless/cellular based
- ✓ Cloud based
- ✓ Mobile app enabled
- ✓ Extensive Support System
- ✓ The value of your peers
